

CS 9.2 All 'ZC' Security Roles (Correct History)

 This Security Documentation is materially complete; however additional information related to roles that require additional SACR Security setup to access data on the pages associated with the role will be added with a link to the SACR setup needed.

Once SACR information is fully references this banner heading will be removed.

Purpose: Use this document as a reference for all menu navigation paths related to each ZC (correct history) role established through the Security Re-Design effort. The Z roles are designed around 3 key concepts:

- ZZ roles grant add/update access to pages to perform the work.
- ZD roles grant read only access to pages to see, but not touch.
- ZC roles enable a key responsible individual or their backup to have access to Correct History functionality to pages where correct history could negatively impact the integrity of the data if not properly updated.

Please Do Not assign the ZD, ZZ and ZC version of the same role to the same individual.

Choose ONE version of the role for that specific user to avoid role conflicts that will effectively restrict access to "view only" on some pages even though they have the Processor or Correct History role.

The links below will jump to the relevant header section that start the list of the appropriate set of roles.

- [ZZ Processing Roles](#)
- [ZD Read Only Roles](#)
- [ZC Correct History Roles](#)

In addition, in a reference guide, FirstLink colleges will find a CTC to Z Role Cross-Walk. The intent is to aid those colleges in translating the old CTC roles to the relevant 'Z' roles that replace some aspect of the access from the larger CTC roles.

Keep in mind that CS role assignment is not sufficient in most cases to grant access to return search results. SACR Security must also be applied to ensure access to data at your institution. All CS Staff access requires [basic SACR Security](#) for the institution. Certain roles require additional SACR Security. Please refer to the [SACR Security](#) reference materials for more details.

Audience: Managers approving security access for staff and College IT Security needing clarity on the access requested.

ZC SR Local Configuration

- Configuration pages under revision.

ZC SR Milestones

The Student Records Milestones role allows users to batch process milestones and manage student milestones in correct history mode. The role alone does not ensure access to the data needed to define requirements. Users must also have established [SACR Security Basic Requirements](#) that define their institution, campus, career and academic organization access in the CS Pillar. In addition, users will also need [SACR Milestone Security](#). The ability to launch batch processes in the process scheduler also requires that the Security User Profile be defined with a Process Profile of **CTC_PT_PRCSPRFL_STAFF**.
