

CS 9.2 All 'ZZ' Security Roles (Processor)

💡 This Security Documentation is materially complete; however additional information related to roles that require additional SACR Security setup to access data on the pages associated with the role will be added with a link to the SACR setup needed.

Once SACR information is fully referenced this banner heading will be removed.

Purpose: Use this document as a reference for all menu navigation paths related to each Z role established through the Security Re-Design effort. The Z roles are designed around 3 key concept:

- ZZ roles grant add/update access to pages to perform the work.
- ZD roles grant read only access to pages to see, but not touch.
- ZC roles enable a key responsible individual or their backup to have access to Correct History functionality to pages where correct history could negatively impact the integrity of the data if not properly updated.

Recommendation: It is best not to assign the ZD, ZZ and ZC version of the same role to the same individual. Choose ONE version of the role for that specific user to avoid role conflicts that will effectively restrict access to "view only" on some pages even though they have the Processor or Correct History role. Traditionally the higher level access overrides, meaning, if a user has ZZ and ZD, the ZZ would trump and the user would have update access. However there are certain pages in the system that will cause the user with a ZZ and ZD role to only have Read Only Access.

Use this query to troubleshoot: QCS_SEC_MULT_VERSION_OF_ROLE

The links below will jump to the relevant header section that start the list of the appropriate set of roles.

- [ZZ Processing Roles](#)
- [ZD Read Only Roles](#)
- [ZC Correct History Roles](#)

Keep in mind that CS role assignment is not sufficient in most cases to grant access to return search results. SACR Security must also be applied to ensure access to data at your institution. All CS Staff access requires [basic SACR Security for the institution](#). Certain roles

require additional SACR Security. Please refer to the SACR Security reference materials for more details.

Audience: Managers approving security access for staff and College IT Security needing clarity on the access requested.

 **Are You Lost?** If you're not sure how to determine which Z roles a staff person needs, please refer to the [Query Search for Security Roles](#) in CS materials designed to allow colleges to enter a page name or part of a navigational path to search for roles that have access to that page/component.

ZZ Processing Roles

ZZ AA Advisement Reports

The academic advisement requirement role allows users to establish academic requirements for advising. The role alone does not ensure access to the data needed to define requirements. Users must also have established [SACR Security Basic Requirements](#) that define their institution, campus, career and academic organization access in the CS Pillar. In addition, users will also need [Academic Program Security](#).

- Academic Advisement> Student Advisement> Request Advisement Report> Advisement Report Request

- Academic Advisement> Student Advisement> Request Multiple Reports> Report Request Header
- Academic Advisement> Student Advisement> Request Multiple Reports> Report Request Details Work

ZZ AD App Entry

The Admissions Application entry role allows users to manage application and test score data. The role alone does not ensure access to the data needed to manage student admissions data.

Users must also have established [SACR Security Basic Requirements](#) that define their institution, campus, career and academic organization access in the CS Pillar. In addition, users will also need [Academic Program Security](#).

ZZ AD App Eval

The Admissions Application Evaluation role allows users to evaluate and make decisions on admissions applications. The role alone does not ensure access to the data needed to manage student admissions data. Users must also have established [SACR Security Basic Requirements](#) that define their institution, campus, career and academic organization access in the CS Pillar. In addition, users will also need [Academic Program Security](#).

- Student Admissions> Application Evaluation> Application Decisions> Admission Comments> Student Admission Comments

- Student Admissions> Application Evaluation> Application Decisions> Maintain Applications> Configurable Personal data
- Student Admissions> Application Evaluation> Application Decisions> Maintain Applications> Research Admissions Page
- Student Admissions> Application Evaluation> Evaluate Application Materials> Application Materials> Application Materials

ZZ AD App Fees

The Admissions Application Fees role allows users to calculate and deposit on admissions application fees in batch. The role alone does not ensure access to the data needed to manage student admissions data. Users must also have established [SACR Security Basic Requirements](#) that define their institution, campus, career and academic organization access in the CS Pillar and requires a Process Profile of CTC_PT_PRCSPRF_STAFF on the Security User Profile.

- Student Admissions> Application Fees and Deposits> App Deposit Fees Process> Deposit Fee Calc (Batch)
- Student Admissions> Application Fees and Deposits> Application Fees Process> Application Fee Calc (Batch)
- Student Admissions> Application Fees and Deposits> Review Batch Application Fees> Application Fees Calc (Batch)
- Student Admissions> Application Fees and Deposits> Review Batch Deposit Fees> Deposit Fees Calc (Batch)

ZZ AD App Mass Change

The Admissions Mass Change role is designed to isolate access to processing mass changes to admissions applications to a separate role granted only to those who need this level of access. The role alone does not ensure access to the data needed to manage student admissions data. Users must also have established [SACR Security Basic Requirements](#) that define their institution, campus, career and academic organization access in the CS Pillar. In addition, users will also need [Academic Program Security](#).

- Student Admissions> Processing Applications> Mass Change> Mass Change Definition> MC SA Specific Defaults

ZZ AD Prospect Entry

The Admissions and Recruiting Prospect Entry role grants the user access to Prospect Management functionality within PeopleSoft. The role alone does not ensure access to the data needed to manage student admissions data. Users must also have established [SACR Security Basic Requirements](#) that define their institution, campus, career and academic organization access in the CS Pillar. In addition, users will also need [Academic Program Security](#).

ZZ CC 3Cs Config

The Campus Community 3Cs (communication, comments and checklists) Config role grants certain users the ability to setup 3Cs processes. This role requires specialized training to be useful to the super user assigned this access. The role alone does not ensure access to the data needed to manage student admissions data. Users must also have established [SACR Security Basic Requirements](#) that define their institution, campus, career and academic organization access in the CS Pillar. In addition, users will also need [Academic Program Security](#).

- Campus Community> 3C Engine> Set Up 3C Engine> 3C Engine - Event Security

- Campus Community> Communications> Set up Communications> Communication 3C group

ZZ CC 3Cs Mass Change

The Campus Community 3Cs (communication, comments and checklists) Mass Change role grants certain users the ability to perform Mass Changes to Checklists or Communications 3Cs processes. The Mass Change utility is a SQL generator used to perform high-volume business transactions, such as updating data for multiple students without accessing each student record online, but performs the mass change directly to the database based on templates configured in the system. The role alone does not ensure access to the data needed to manage student admissions data. Users must also have established [SACR Security Basic Requirements](#) that define their institution, campus, career and academic organization access in the CS Pillar. In addition, users will also need [Academic Program Security](#).

- Campus Community> Checklists> Mass Change - Checklists> MC SA Specific Defaults
- Campus Community> Communications> Mass Change - Communications> MC SA Specific Defaults

ZZ CC 3Cs User

The Campus Community 3Cs (communication, comments and checklists) User role grants users the ability to access 3Cs related pages. The role alone does not ensure access to the data needed to manage student admissions data. Users must also have established [SACR Security](#)

[Basic Requirements](#) that define their institution, campus, career and academic organization access in the CS Pillar. In addition, users will also need [Academic Program Security](#).

ZZ CC Campus Event Plan Config

The Campus Community Event Plan Configuration role grants access to the Campus Community Event Planning pages used to help plan and manage campus events. Overall, the system allows for creating campus events, which are set of meetings comprising one overall event, and each meeting can have resources and staff assigned to it. For example, you could create an event called Orientation. Your template might include meetings such as a welcome reception, a general session, several workshops, and a tour of the campus. You can identify the required resources for each meeting (tables, chairs, brochures, banners, and so on), and assign and schedule the responsible staff. The Campus Community Event Plan Configuration role provides access to the pages needed to establish the event. Another role, [ZZ CC Event Committees](#) provides access to the pages needed to establish the committees (resources) to engage in those events.

The role alone does not ensure access to the data needed to manage student admissions data. Users must also have established [SACR Security Basic Requirements](#) that define their institution, campus, career and academic organization access in the CS Pillar.

- Campus Community> Campus Event Planning> CTC Custom> Recruiting Event Report Run
- Campus Community> Campus Event Planning> Event Management> Campus Events

ZZ CC Event Committees

The Campus Community Event Committees role grants access to the Committees pages used to help plan and manage campus events. Overall, the system allows for creating campus events, which are set of meetings comprising one overall event, and each meeting can have resources and staff assigned to it. For example, you could create an event called Orientation. Your template might include meetings such as a welcome reception, a general session, several workshops, and a tour of the campus. You can identify the required resources for each meeting (tables, chairs, brochures, banners, and so on), and assign and schedule the responsible staff.

The Event Committees role is limited to managing the types of committees and roles individuals would play on a committee that could be associated with an event or activity. Another role, [ZZ CC Campus Event Plan Config](#) provides access to the pages needed to establish the committees (resources) to engage in those events.

The role alone does not ensure access to the data needed to manage student admissions data. Users must also have established [SACR Security Basic Requirements](#) that define their institution, campus, career and academic organization access in the CS Pillar.

- Campus Community> Committees> Committee Type/Role> Committee Table
- Campus Community> Committees> Manage Committees> Committee
- Campus Community> Committees> Manage Committees> Committee Members

ZZ CC Personal Info Student

The role alone does not ensure access to the data needed to manage student admissions data. Users must also have established [SACR Security Basic Requirements](#) that define their institution, campus, career and academic organization access in the CS Pillar.

ZZ CS Search Class Cat Faculty

The Campus Solutions Search Class Catalog Faculty role grants access to users to browse the course catalog, search for facilities and search enrolled students' courses and classes. The role alone does not ensure access to the data needed to manage student admissions data. Users must also have established [SACR Security Basic Requirements](#) that define their institution, campus, career and academic organization access in the CS Pillar.

- Records and Enrollment> Enroll Students> Search in Catalog> Catalog Search Results

ZZ CS SEVIS

The Campus Solutions SEVIS role grants users access to processing SEVIS for International Students. Student and Exchange Visitor Information System (SEVIS) is an internet-based system that electronically monitors and reports on international students and exchange visitors and their dependents. Colleges are not actively using this functionality in ctcLink, but the role exists for possible future use. The role alone does not ensure access to the data needed to manage student admissions data. Users must also have established [SACR Security Basic Requirements](#) that define their institution, campus, career and academic organization access in the CS Pillar.

ZZ SR Mass Enrollment

The Student Records Mass Enrollment role allows users to mass enroll groups of students. The role alone does not ensure access to the data needed to define requirements. Users must also have established [SACR Security Basic Requirements](#) that define their institution, campus, career and academic organization access in the CS Pillar. In addition, users will also need SACR Enrollment Security.

- Records and Enrollment>Enroll Students>Mass Enrollment>Mass Enrollment

ZZ SR Milestones

The Student Records Milestones role allows users to process and manage student milestones. The role alone does not ensure access to the data needed to define requirements. Users must also have established [SACR Security Basic Requirements](#) that define their institution, campus, career and academic organization access in the CS Pillar. In addition, users will also need [SACR Milestone Security](#).
